

## Neurosurgery Teleconsults

**Full-service neurosurgery teleconsults working with patients across all areas of emergency and routine neurological care.**

### HOSPITAL BENEFITS

- 80% of Neurosurgery patient consultations don't actually require a face-to-face, physical examination
- Increase patient retention through reduced patient transfers
- Give your care providers access to much sought-after specialty physician consultations
- Support ED and inpatient physicians with timely admission and transfer decisions
- Improve diagnostic accuracy and early access to advanced neurological and spine care
- Yields comparable results to live, in-person visits
- Addressing CMS core measures and Joint Commission requirements
- Higher satisfaction of on-site physicians requesting specialty physicians
- Adding strength to the recruitment and retention of on-site specialty physicians
- Improve physician skills inpatient management of neurological related diagnosis
- Support the growth of affiliated neurological Practice in partner Hospitals and Groups
