

Shared Services for Specialty Telemedicine

Harnessing the Power of Unity to Enhance Patient Care

The STeM ALLIANCE PROGRAM is designed to reduce costs while delivering simultaneous telemedicine coverage. By grouping hospitals in a collective buying model, we optimize efficiency and streamline medically appropriate utilization.

The Result: World-class care is accessible to every hospital, regardless of its size.

WHO CAN PARTICIPATE

Critical Access Hospitals and small to medium-sized hospitals:

3+

In groups of three or more

&

In the same geographic region and/or health system

&

With the same specialty coverage needs

Participating hospitals identify other sites to form their group

HOW IT WORKS

Individual service agreements with STeM have standardized terms among the group:

Specialty Covered

Scope of Work

Unified Call Schedule

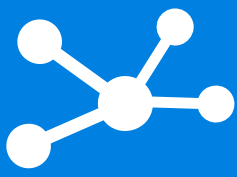

Termination Date

Reduced Monthly Minimums

PROGRAM BENEFITS

Consolidating smaller hospitals into a larger functional network creates unique value:

Shared administrative costs, overhead, and minimum volumes

Strengthened inter-hospital collaboration

Enhanced patient access

Reduced financial pressures for hospitals with limited resources

TECHNOLOGY REQUIREMENTS

While STeM is technology neutral, optimal efficiency is achieved when hospitals use STeM's preferred technology platform.
