

Elevated Care through Comprehensive Telemedicine

Tele-Infectious Disease

Specialty Care that Strengthens Your Bottom Line & Clinical Outcomes

Infectious Disease (ID) support is essential—but hard to come by. Many hospitals face costly gaps in coverage, delayed consults, or struggle to meet antibiotic stewardship requirements. **Tele-ID effectively fills that gap.**

With Tele-ID consults, hospitals gain access to board-certified specialists who can:

Assist with improved Leapfrog grading

Help reduce transfers and length of stay

Improve sepsis management with focused treatment plans

Decrease pharmacy costs & ensure the use of appropriate and cost-effective antibiotics

Support compliance with CMS and Joint Commission standards

SERVICE OVERVIEW | INPATIENT

We support local hospitalists, intensivists, and clinical staff through a collaborative approach to managing complex infections and medications.
