

Elevated Care through Comprehensive Telemedicine

Tele-Infectious Disease

Specialty Care that Strengthens Your Bottom Line & Clinical Outcomes

Infectious Disease (ID) coverage plays a critical role in patient outcomes. Unfortunately, many hospitals lack adequate access to ID specialists, creating costly gaps in coverage and jeopardizing crucial follow-up care. **Tele-ID effectively fills that gap.**

With Tele-ID, hospital-supported clinics can access board-certified ID physicians who:

Oversee complex post-discharge care plans

Support compliance with CMS and Joint Commission standards

Manage Outpatient Parenteral Antimicrobial Therapy (OPAT)

Help reduce avoidable transfers and readmissions

SERVICE OVERVIEW | OUTPATIENT

We support clinics through a collaborative approach to managing complex infections and medications.

CLINIC COVERAGE

Pre-scheduled 4-hour blocks of coverage provide ease of scalability

Existing and new patients are accommodated

Medication management and treatment plan optimization enhance patient satisfaction

IT'S NOT JUST ABOUT CONVENIENCE... IT'S ABOUT IMPACT

Efficiencies
Patient Retention
Financial Returns
HCAHPS Scores

Complications
Local Physician Burnout
Readmissions
Transfers
