

# Elevated Care through Comprehensive Telemedicine

## TeleNeurology

### Outpatient Neurology Telemedicine

As demand for outpatient neurology continues to rise—and wait times for in-person specialists grow—STeM offers a timely, effective solution. Our Outpatient TeleNeurology services empower hospitals and clinics to deliver prompt, accurate diagnosis, management, and treatment for a wide range of neurological conditions and diseases. By integrating our services into a hospital-supported community clinic, you can enhance patient access, improve outcomes, and meet expectations—without the delays.

#### SERVICE OVERVIEW

We support local Neurologists in a collaborative manner, enhancing their work-life balance, **or** we can deliver a standalone program if local specialists are not available.

#### CLINIC COVERAGE

Pre-scheduled 4-hour blocks of coverage provide ease of scalability

Evaluation and management of new and existing patients

Medication management and treatment plan optimization enhance patient satisfaction
