

Elevated Care through Comprehensive Telemedicine

TelePulmonology

Comprehensive Inpatient Pulmonology Telemedicine

STeM's Pulmonologists deliver timely evaluations and treatment for patients with various acute and chronic pulmonary conditions. As our aging population continues to grow, timely evaluation of challenging or atypical conditions encountered in the inpatient and ED setting can provide improved outcomes for many patients. Working in concert with your local providers, our board-certified telemedicine pulmonologists help optimize diagnosis, evaluation, and treatment strategies.
