

Elevated Care through Comprehensive Telemedicine

TeleStroke

Emergent Stroke Telemedicine

Stroke is a leading cause of death and disability, affecting nearly 800,000 Americans each year. Fast, accurate stroke intervention is critical in the prevention of long-term disability or death, yet many hospitals lack access to 24/7 on-site neurologists who can make life-saving treatment decisions.

STeM's TeleStroke Program Delivers 24/7 Expert Neurology Support

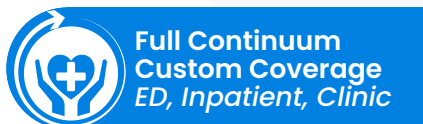

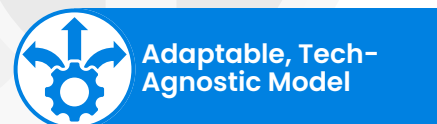

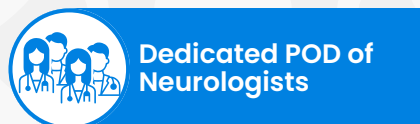

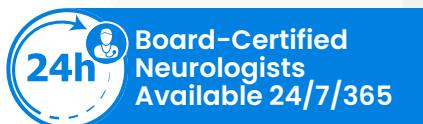

IMPROVING STROKE CARE

- Real-time video consults within minutes of ED arrival
- Remote imaging interpretation (CT/MRI)
- NIHSS assessments and treatment recommendations
- tPA eligibility decisions and transfer guidance

PROVEN IMPACT FOR HOSPITALS

- Reduced Door-to-Needle Times
- Increased tPA Administration Rates (from 3% to 30%)
- Decreased Transfer Rates (up to 60%)
- Improved Patient Outcomes
- Enhanced ED Flow and Efficiency
- Elevated support for CMS and Joint Commission Compliance

Why Hospitals Choose STeM's TeleStroke Program
