

# Telemedicine for Rural Acute Care

Expert Specialty Care for Rural Hospitals, Clinics, and Communities

Rural and Critical Access Hospitals face persistent gaps in specialty coverage. Without timely consults, patients are often transferred out of the community, disrupting care, increasing costs, and straining families and providers. These gaps threaten patient outcomes and the long-term sustainability of rural hospitals.

## No Transfers Required

Specialist TeleMed (STeM) delivers on-demand specialty consults through a seamless, scalable telemedicine model, helping rural and CAHs keep care local, reduce transfers, and strengthen community health.

### How We Help Rural Hospitals Thrive

#### Access to 24+ Specialties

Cardiology, Critical Care/ICU, Infectious Disease, Nephrology, Pulmonology, and more.

#### Keep Care Local

Immediate access to board-certified specialists, no unnecessary transfers.

#### 24/7 Flexible Coverage

Gap coverage, after-hours/weekends, ED/Inpatient, OP clinic care tailored to your needs.

#### Technology-Agnostic

Use your existing equipment, choose your own vendor, or use our tech partner.

### Why Choose STeM?

Trusted by rural hospitals from Hawaii to Maine

Personalized service with national resources
